Celeste you won't fit in (borrow my blindfold)
around here the leave no room for change (I'll be there
for you)
It's a chemical imbalance in my brain (And ask me to be
your savior, I won't)
Celeste we've become unified (I was not designed
strong enough at all)
in the boundaries between you and I (you and I have
become entwined)
So surrender yourself to the void.

Is it worth being if you only become a mannequin who
breathes and walks?

Celeste you won't fit in (Balance must not be easy)
It's a chemical imbalance in my brain (And ask me to be
your savior, I won't)
Celeste we've become unified (I was not designed
strong enough at all)
in the boundaries between you and I (you and I have
become entwined)
So surrender yourself to the void.
