

## Arise "Abducted Intelligence"

Visit "[Abducted Intelligence](#)" on MotoLyrics.com

What do we know about our past? Abducted souls in a cold script-stone.

Buildings, structures - visions or insanity? A past abducted?

[Chorus]

Our past abducted, vanished in the ruins! Our past rejected, a greater mind disconnected!

Knowledge, intelligence selflearned and forgotten, ancient scripts of a future civilisation?

Heyrogllyphes speaking of forgotten intelligence, a past rejected?

Our past forgotten - abducted intelligence!?

[Chorus]

Our past abducted, vanished in the ruins! Our past rejected, a greater mind disconnected!

Are you afraid of what the truth might say?

To dig up science instead of graves?

Supreme intelligence greater than all, our past reflected?

[Chorus]

Our past abducted, vanished in the ruins! Our past rejected, a greater mind disconnected.
