"Nuclear Ray Infected"

Visit "[Nuclear Ray Infected](#)" on MotoLyrics.com

This was once a beautiful place, but now it's dead, we
killed it long ago.

With dusted eyes and dry mouths we are trying to
survive.

We're exposed to the nuclear sun, can't breathe in the
sour air and all
water is almost gone, the earth has been dried out. We
are the last species

left, our planet laid to waste.

With dusted eyes and dry mouths we are trying to
survive.

[Chorus x3]

There is a virus spreading in my veins, it's to late to
cure me.

I'm mutating anyway, contaminated, nuclear ray
infected.

It's to late, we can't turn the time back.
