The snow in the air  
To sing me a lullaby  
My winter, come hither to me

The dark nights to come  
So kiss me for good-bye  
The grace of the godland is near to you

Show me the flowers invisible  
Sing me the hymns inaudible  
The wind is my voice  
The moon is my heart  
Come find me, I'm on every hills and fields  
I'm here... ever your near...  
(Sing for your love, gone so far in the past)  
(Pray for the world, that you may rest in peace)

The snow in the air  
To sing me a lullaby  
The angel of rebirth is here

So let all your pain  
Sleep within the husha-by  
The grace of the godland  
Grace of the godland  
Grace of the godland is near...  
So close to you
