She needs to know anything
Stratosphere
but i've never seen anything out of my block
i was sick when chances were given
If she could teach me her secret dance steps
we'd dance through fields
through lands of sadness
she got a spot
for some blue samba
you're a blessing in disguise
have some rest a day or two
and yer nerves may too

as i'm in
a place which i've never been
since you do not have your lens
you should trust me takin' you there
seems like dance hall but it's a kitchen
seats are free there's no one in there
you're so smart
i'm just stoked
we flow out in the country yard
have some rest
a day or two
and yer nerves may too
