The wishing well is missing  
The wishes and the innocent eyes  
And maybe the war is won  
Still we return to pick up the gun  
X human.

What is frail and what is robot  
Change is not a moment past oneself  
Wants and needs  
Lovers love, holding dreams and catastrophe  
X human

The day when all was simple  
The complicated biting our backs

Wants and needs  
Lovers love, holding dreams and catastrophe  
Let the lovers...let them love

The night is soon over  
This is a call to recover us

Let the lovers...let them love  
I'll pull you up until you breath  
But chances are you don't need me for this one
