Come on now and show a bit of faith
Come aside and I'll give you what you want
Take a look before you shut me out
Let us be the ones they'll talk about
I want you so bad, I think I'll lose my mind
I want you so bad, I'm a horror face
You like me this way at least that's what I'm told
Touch me and I will explode
You were supposed to be different but you're all the same
It makes me sick, but I'm going down again
Come on now give me another flash
Images of my horror face
The fast lane is the only way for me
And I'll be everything I ever wanted to be
It was supposed to be different but it's all the same
Now where is my love when I need her the most?
Kissing my lips, holding my hand
It makes me sick but I'm going down again
