As time goes by,
I think about what I dream of doing
I can see it now,
The stage lights, oh it's overwhelming
Raise your head up to the sky,
This is what you've been waiting for
Imagine yourself up flying high,
Never feeling like a prisoner of war

Chorus:
I am the melody of my song,
I am the beat to this rhythm
I am the reason you are here,
So sit, stay awhile, we're on a journey
I am the melody of my song,
I am the beat to this rhythm
I am the reason you are here,
It's something like you've never seen before

Do you feel the music moving inside you?
A deadly sin that's got you on your knees
The chained up door is where you need to go through
There's your fantasy, it grew like a disease
The way I see it, I'm stuck in between
I don't understand what the hell is going on
I need a break, I need to breathe
There's not much more that I can take

Chorus
Guitar solo
Chorus

Like you've never seen before (x5)
