### "Stepping Forward"

You know the feeling that you get?  
The adrenaline coursing through you,  
Never knowing if you'll make it,  
Always wondering what to do  
I need to know if you'll step up,  
Be the leader that moves us forward  
We need you, where are you now?  
Hurry up, we are being cornered

Chorus:

This nation brought us down into  
The depression they have left us with  
And in my mind, I cry for help from you  
A fallen hero will save us from the lies,  
The deceiving demons in the skies  
Come on now, who's stepping forward?  
Who's stepping forward?

The future has betrayed us,  
This so called dream we're living in  
I lay here in a pool of dust,  
Soaking up the remains of all that is left  
The buildings have fallen  
And the angels lied  
Nothing left to sacrifice,  
But to those who have died
