Tired of this done with that
Never satisfied with where I'm at
Sit and think what to do
Just a motherfuckin' bore without a clue

Shot my drugs, drank my booze
Tired of joy and self abuse
Eternally jaded through and through
Just a self loathing dick without a clue

Bored to death, I'm just bored to tears
Same old shit just different day and year
Killed myself but that got boring too
So beyond the point where it's not true

Far beyond high dramatically low
Eternal stare as if I care to know
All of this struggle, all of this work
In the end you die like some moronic jerk

Shot my drugs, drank my booze
Tired of joy and self abuse
Eternally jaded through and through
Just a self loathing fuck without a clue

Bored to death I'm just bored to tears
Same old shit just different day and year
I killed myself but that got boring too
So beyond the point where it's not true

Yeah the colors I see are all bleeding
The sound that was is now standing still
Wonder when it was it all faded
A stolen corpse which cannot be killed

Oh bored to death, I'm just bored to tears
Same old shit just different day and year
Killed myself but that got boring too
So beyond the point where it's not true
