What can I do, I can't find the words  
I'm trying and trying, I wait  
Nothing happens  
I scream inside myself instead

I can't express myself with my hands  
I can't trust them, nobody cares  
I keep trying, nobody cares  
Nobody cares

I open myself, timidity  
And without the words  
I, I feel, I'm feeling

And if you open yourself  
Show me what you are feeling  
Then we can talk without words, without words

You don't always need words to speak  
Just let your feelings go  
I'll read them as if they were words  
You can express yourself without words, without words

Without words, without words
