There's a place you see behind the sun,
there's space in time, inside our heart.
I can live alone, desert you, I can do that
but I dream of you inside my heart, my arms.

There's a time to wait and time to go,
so please don't be ... just follow your heart.
You can leave me here to wait for you, you can do that,
coz I can set you free from pain and hurt and hurt.

I can see your eyes in the distant space,
so you don't move aside and have a doubt.
I can make you fly come and take my hand,
don't you move aside.
I feel energy come and jump with me,
you can rich the stars.
Don't ever end if your spirit shine,
stay by my side...

I can see your eyes in the distant space,
so you don't move aside and have a doubt.
I can make you fly come and take my hand,
don't you move aside.
I feel energy come and jump with me,
you can rich the stars.
Don't ever end if your spirit shine,
stay by my side.

I can see your eyes in the distant space,
so you don't move aside and have a doubt.
I can make you fly come and take my hand,
don't you move aside.
I feel energy come and jump with me,
coz you can rich the stars, don't have a doubt.
Don't ever end if your spirit shine,
stay by my side.
