Don't hear, don't try to lift your own finger
Soon as you speak, the room loses it's grin

You feel you're wise and now you're unfolding
I listen to idiots run our dreams down

Take me over
This is how I've been locked inside
Take me over
And it didn't work this time

Each day I sit in a square, all for nothing
Grinding each pennyworth attitude to live on

And I have you to bathe in my memory
Your words pumped up, played out as you rip into me

Take me over
This is how I've been locked inside
Take me over
And it didn't work this time

All your life you hide in the worst way
Like an easy cure that you cover with mistakes
All your life you hide in the worst way
Like an easy cure that you cover with mistakes
But now I have taken my life from you

Take me over
This is how I've been
Take me over
This is how I've been locked inside
Take me over
And it didn't work this time

All your life you hide in the worst way
Like an easy cure that you cover with mistakes
All your life you hide in the worst way
Like an easy cure that you cover with mistakes
