Cover Up with love and protection,
Guard your life in any direction,
Don't give up for fear of rejection,
Stand your ground of voice and objection,

Runaway my sister and brother,
Being afraid of love with another,
Tries to read the book by her cover,
Wrapped up in the arms of an other,

Cover Up with love and protection,
Guard your life in any direction,
Don't give up for fear of rejection,
Stand your ground of voice and objection,

Just in case the fires are burning,
Said for sure the tides are not turning,
Love to watch the love with your learning,

Cover Up with love and protection,
Guard your life in any direction,
Don't give up for fear of rejection,
Stand your ground of voice and objection,

Look again the futures depending,
And no built we start defending,
Tell them the message were sending,
We don't want an unhappy ending,

Cover Up with love and protection,
Guard your life in any direction,
Don't give up for fear of rejection,
Stand your ground of voice and objection,

You've gotta be safe if you wanna get freed,
To sit in the shades of her family tree,
Runaway my sister and brother,
Being afraid of love with another,
Tries to read the book by her cover,
Wrapped up in the arms of an other,

Cover Up with love and protection,
Guard your life in any direction,
Don't give up for fear of rejection,
Stand your ground of voice of objection,

You've gotta be safe if you wanna get freed,
To sit in the shades of her family tree,
You've gotta be safe if you wanna get freed,
To sit in the shades of her family tree,
You've gotta be safe if you wanna get freed,
To sit in the shades of her family tree,
You've gotta be safe if you wanna get freed,
To sit in the shades of her family tree,
