Voices in the night
There is no way to changing, time to run or die
All this standing shadows, fading one by one
They don't care where you running, I can't stop anyway
Tonight I try to do it til the morning comes
Do we stay together, I can't stop anyway
Each night I want to say it, I have to get away

Voices in the night, shadows falling to the ground
Voices in the night, I've never seen you so afraid
Voices in the night, shadows falling on the ground
Voices in the night, no one will ever understand

Think of those day's you've spend there
A thousands year ago, on a foreign planet
Circuld round the sun, do we stay together
I can't stop anyway, will this changed tomorrow
Or should I go today

Voices in the night, shadows falling to the ground
Voices in the night, I've never seen you so afraid
Voices in the night, shadows falling on the ground
Voices in the night, no one will ever understand

Do we stay together, I can't stop anyway
Each night I want to say it, I have to get away

Voices in the night, shadows falling to the ground
Voices in the night, I've never seen you so afraid
Voices in the night, shadows falling on the ground
Voices in the night, no one will ever understand
