### "Blackout"

Visit "[Blackout](#)" on [MotoLyrics.com](https://MotoLyrics.com)

too late for you  
but maybe you can help me  
go spread the word to your idiot friends

i could talk all day  
and still no one would hear me  
so i sit all night and plan for the end

i think it's time for blackout  
turn off the radio  
open your tiny little minds  
listen for once

what you've been missing all your life  
no more video  
every satellite stand  
by ready or not  
i'm pulling the plug  
so step aside direct connect  
if it makes you feel better  
don't get too attached

i just gave word  
my boys up state  
are down with apple vengeance  
from the inside out the web will burn
