Hands touching hands  
Through a curtain that no longer stands  
Sister and brother embracing each other  
It's tumbling down

Light from both sides  
Is changing political tides  
It's turning from clashes to keepsakes and ashes  
It's tumbling down

Watch as we waltz in the sand  
On this no-mans land  
See our world turn around  
Watch it come tumbling down

And through it all  
The watchtowers and garrisons fall  
Machine guns and fire  
The tanks and barbed wire  
Come tumbling down

And in the end  
Watch as we spend  
Our moments together  
While notions forever  
Come tumbling down

Watch as we waltz in the sand  
On this no-mans land  
See our world turn around  
Watch it come tumbling down

Machine guns and fire  
This concrete messiah  
Comes tumbling down
