written by Stefan Arnglim & Warren Zevon 1989

Dark Victory Twins/Zevon Music Inc. BMI

There's a way to live that's right for us

Like Mayans in Manhattan and Los Angeles

I'm scaling up, I'm breaking down

And I'm doing lunch all over town

Networking, I'm user friendly

Networking, I install with ease

Data processed, truly Basic

I will upload you, you can download me

There's a long hard road and a full hard drive

And a sector there where I feel alive

Every bit and every byte

Is written down once on the night

Networking, I'm user friendly

Networking, I install with ease

Data processed, truly Basic

I will upload you, you can download me

There's a prayer each night that I always pray

Let the data guide me through every day

And every pulse and every code

Deliver me from the bypass mode

Networking, I'm user friendly

Networking, I install with ease

Data processed, truly Basic

I will upload you, you can download me
