Happy robots say "life is fine", they're the ones I loathe  
they're stupid or they're lying - or a little bit of both.  
Ignore disasters and say that life is great,  
it never stops a smile on your shit consuming faces.

The stupid hippies, too stoned to see their lives are  
fucked,  
Go with the flow into the shitter they are sucked  
and then they  
they've got these magic crystals that dont do a god  
damn thing.  
just stinking of pachoulli while they choke on their  
ginseng.

beating on a drum you sing of quiet and peace.  
burning marijuana and take the time to hug a tree  
say no possessions but get all that you can.  
you stink like shit and smile through it  
dont ever trust a happy man.

Cheery retard masses with evil osmond smiles,  
way too glad to be here cause "he" is on your side  
and then they  
hand out propaganda for sheep to join the cult.  
collecting guns they rape your daughters but its  
nobody's at fault.

I dont want to go to heaven, its filled with pricks like  
you  
i wont go inside the gates, leave me in the waiting  
room,  
im sure that god hates you, he thinks your an obsessed  
fan.  
see how you are, i'll never trust a happy man,  
never trust a happy man.
