Gotta get that same damn feelin'
In the humidity of the city
Hot and sweaty, time to shed
The layers in the back seat
Just teens, not a care in the world
But about the time when I was ready to
Curl up die nobody understood like you,
And nobody made me feel as good as you do yeah
But she in me moves
Did I expect you to wait for me, date only me
They only see what's on the outside lookin' in

Do that thing that you did when you went down on me
Last summer I felt so emotional
One thing that I won't forget
The way you looked up with those wicked eyes
They told me everything
Wicked eyes, they told me everything

You pulled the shades in the living room
With nobody home
You pulled strings when you let me think
I was the only one
And I remember hanging on the back porch
And the source of it
Let's talks and sidewalks with walks
And nobody understood like you
And nobody made me feel as good as you do yeah
But she in me moves (4x)

Do that thing that you did when you went down on me
Last summer I felt so emotional
One thing that I won't forget
The way you looked up with those wicked eyes
They told me everything
Wicked eyes, they told me everything

You woke up this mornin'
And found me alive
And it feels like forever
You pushed me aside

I just wanted to get you here anyways
So what, so now we're even

Another dumb reason to fight
And you're so beautiful when you cry
I'm dry and insensitive
Your sly and defenitive
What next sex and more ex-lover talk

Do that thing when you went down on me
Last summer I felt so emotional
One thing that I won't forget
The way you looked up with those wicked eyes
They told me everything
Wicked eyes, they told me everything.

(wicked eyes)Do that thing that you did when you went
down on me
Last summer I felt so emotional(wicked eyes)
One thing that I won't forget
The way you looked up with those(wicked eyes)
Do that thing that you did when u went down on me
Last summer I felt so emotional(wicked eyes)
One thing that I won't forget
They told me, they told me everything
