VERSE 1:

You know it's not the only answer,
But still you wanna take that chance,
Your eyes cannot see further than today.
Step back, take a good look at your life
See what you can do to make it right,
There's gotta be a better way.

PRE-CHORUS:

Woo-ooo-ooo
(You know it's not the only answer)
Woo-ooo-ooo
(The least you could have done was tell me)
Woo-ooo-ooo
(I need you here)

CHORUS:

There are the words that I would say to you if you were
here with me,
See I know things about you the world will never see,
I wanna tell you that I love you, I miss you everyday
Sarah come back to me now, and take this pain away

VERSE 2:

You keep it all deep inside,
But what's the point trying to hide
The fact you feel your life cannot go on?
When you felt down and depressed
You should have got it off your chest
The world is sorry now you're gone

BRIDGE:

Why did this have to be black or white?
Somewhere in between we could have made it right
There was something that set you apart
My first love; my first broken heart
That will never heal, and I'm wrong
If I think I can do you justice with just one song
