soothsayers predict a holocaust  
corrupt politicians, defend this way of living  
whatever the loss - at any cost

where did we go wrong?  
we crossed the finishing line  
and burnt our sinking ships  
has god forsaken us?

multinational corporate greed  
feed on the poor and the weak  
no matter what race or creed  
the future looks depressingly bleak  
once a privileged race  
now living on borrowed time  
sins of our fathers, catching up  
breathing down our necks

we pray for salvation  
in this world of mutilation  
man's fate - termination  
in this world of deprivation (mutilation -  
dehumanization)  
we've been digging our own massgrave  
for god knows how many centuries  
killing our own flesh and blood  
spreading disease, killing the trees  
third stone from the sun  
suffering from ignorant neglect  
our home - mother earth  
mankind refused to show respect

we never expected the end  
to be from heaven sent  
it was death from above  
that struck down with evil intent  
gotterdammerung - twilight of the gods  
as the world slowly stops to turn  
"sins be as scarlet, they shall be white as snow"  
what did we gain, what did we learn?
