Let Me Know
I set my feet on a well lit path
The way was certain, so I traveled fast
And I was guided
I was blessed
I knew my land of plenty had to be ahead

But the road has ended
And I don't understand
Cause I'm surrounded by soil and sand

Let Me know
Where to go from here
Cause all the signs that led me
have disappeared
Let me know how to fight this fear
That I won't get to where I want to be
If you've got something planned for me,
oh, please let me know

Now storm clouds gather above this barren place
And while the wind laughs at me
The rain slaps my face
So I curl up on the wet dirt floor
And strain to cry out above the thunder's roar (Chorus)

So I surrender all my needs
Hands in my pockets, I find them full of seeds
And so I plant 'em in the earth below
And watch my land of plenty grow

And you let me know that I'm already here
All my desperation disappears
Yeah, you let me know there's no need to fear
This is where you needed me
You had so much more for me, oh
You let me know
