A star up in the sky will never know

Hove lovely is the light that shine below

It's always there, it never fades

Without it magic light how would we find our way

Chorus:

And you don't know how beautiful you are

If your eyes could see the love that's in your heart

Then you would know that everybody sees

That beautiful is all that you could be

What did I feel or think was true

I Can't remember before loving you

You've shown me all that love can be

As beautiful as you are it still amazes me

Chorus:
