I led a lonesome journey
Full of disdain and fury
I kept my angered yearning
Close to me like fire burning

I watched a million chances
Slip through my weathered hands
I almost lost myself when I looked around
There was nobody else

In the nick of time
You opened up my mind
And suddenly I saw the world much clearer

In the nick of time
You turned my water to wine
And suddenly I didn't feel the fear
Right before my eyes

You showed me there was life that to be found
You're the miracle I prayed about
You were the one to save my life
In the nick of time

I followed habits around
Been swept above off the clouds
But fallen down left shaken
Abandoned by the pills I'd taken

I could have kept on going
With no one ever knowing
Who really wants to see
A tired nobody like me

In the nick of time
You opened up my mind
And suddenly I saw the world much clearer

In the nick of time
You turned my water to wine
And suddenly I didn't feel the fear
Right before my eyes

You showed me there was life that to be found
You're the miracle I prayed about
You were the one to save my life
In the nick of time

In the nick of time
You opened up my mind
And suddenly I saw the world much clearer

In the nick of time
You turned my water to wine
And suddenly I didn't feel the fear
Right before my eyes

You showed me there was life that to be found
You're the miracle I prayed about
You were the one to save my life
In the nick of time

I could not, I could not believe
That You were right there waiting
I never, no, I never dreamed
You'd be right there waiting
Oh, You were there for me

In the nick of time
You opened up my mind
And suddenly I saw the world much clearer

In the nick of time
You turned my water to wine
And suddenly I didn't feel the fear
Right before my eyes

You showed me there was life that to be found
You're the miracle I prayed about
You were the one to save my life
In the nick of time
