"Inbetween"

Visit "[Inbetween](#)" on MotoLyrics.com

There's nothing wrong with me
I do everything right
There's something wrong with you
Something wrong not right
My head is talking, talking
Spewing thoughts into your world
You'd sing along
If you only knew the words

Good God!
It flows!
It breathes!

I got you wired for sound
We can communicate
Please don't speak in code
I don't have time for that
Your language turns and spins
In careful contradiction
I'm sick I'm guessing opposites
Around your diction

Take your own advice
You know you could be right
Make big decisions
That could affect your life
And now I'm hearing, hearing
White noise in your brain
Connection has been lost
The frequency - not the same

Good God!
It flows!
It breathes!
