Keeping down your eyes on religion but your brain
thinks of this whore
Your hand is covered of blood and sperm
And the other one rings this door

I want to see the universe, nobody showed me that
before, be my girlfriend, what a nightmare

You better kiss me, better respect me with no love for
hey hey hey
You better hail me, better control me
before it hurts

Embrace me darling I want to get higher your corpse
laying on the floor
Three words you kept, my angel is daying
like the other a night before
