So here we are now,  
A ghost town for an empty heart  
Drive a nail into the wall  
hang me up and let me fall  
Step back and admire the art

And you can pick your poison  
To satisfy your needs (yeah, yeah)  
Show me the way in which you prefer to bleed  
(One knife after another, so complete me  
This world is surely gonna bleed your heart) x3  
One knife after another

So here we are now,  
Left with nothing but the shattered parts  
So sad to see them tainted by the blood on their hands  
Of those who have burned their cards

And you can pick your poison  
To satisfy your needs (yeah, yeah)  
Show me the way in which you prefer to bleed  
(One knife after another, so complete me  
This world is surely gonna bleed your heart) x3  
One knife after another

Lie still, wait to be broken x6

(One knife after another, so complete me  
This world is surely gonna bleed your heart) x3  
One knife after another
