Smoked my first cigarette after being quit for years

I waited long enough and they taste so good with beer

Yes, I'm drinkin' again just a little weekend booze

I'm doin' everything I used to do but lovin' you

I've been down to the factory, even got my old job back

Workin' under Junior Moore again, he won't cut us any slack

But it's better than nothing and it always gets me through

Yes, I'm doin' everything I used to do but lovin' you

Then running into you, seems like old times again

Let's have a drink or two and you can tell me how you've been

It all seems so familiar that it must be Deja Vu

'Cause I'm doin' everything I used to do but lovin' you

Yes, I'm doin' everything I used to do but lovin' you
