If I walk through the city pavement  
It's like a trigger going off in my mind  
A little smile is my only saviour  
A little kiss and my behind!

We've got our own universe, girl,  
I think Rock and Roll is gonna save us!  
We've got our own universe, girl,  
I think Rock and Roll is gonna save us!

She's sitting on a city pavement  
Like she sits in the back of my mind  
A little smile is the only saviour  
A little kiss is what she came here for

We've got our own universe, girl,  
I think Rock and Roll is gonna save us!  
We've got our own universe, girl,  
I think Rock and Roll is gonna save us!

I think Rock and Roll is gonna save us!  
I think Rock and Roll is gonna save us!  
I think Rock and Roll is gonna save us!  
I think Rock and Roll is gonna save us!
