jump into my world  
open up your heart  
I remember the special place  
where love found a start  
somewhere tonight I see your face  
your warm embrace break my chains  
she's gone - out of my life  
and you thrown my heart away  
she's gone - never come back  
two lips don't make a kiss

you gotta try some tenderness  
one heart can't light a fire  
you gotta feel the loneliness  
somewhre tonight I see your face  
your warm embrace break my chains  
she's gone - out of my life  
and you thrown my heart away  
she's gone - never come back  
you turn me back from young to old  
I know your love was just a lie
