Growth; is that what it takes?  
Disintegration; a world full of snakes  
This is Machiavellian Strategy,  
An extensive form of tragedy

Evolution; countercharge the ambivalence  
Devolution; create your own malevolence  
No more mercy, hold your mind  
A culmination of which anything you won't find

Origin of a concealed fate,  
It means we cannot go at any rate  
This is death, this is life  
Is this what existence all will be like?

As pitiful as you will ever be  
Open your eyes and you will finally see  
My omnipotence, no more accessible  
It will only make you more feeble

Challenge; constraint of my aggression  
Only obtained through concession  
Response; obey through authority  
I could only conform to negativity

Origin of a concealed fate  
It means we cannot go at any rate  
This is death, this is life  
Is this what existence all will be like?
