Destroy the world without a thought  
Destroy our lives with your bug bombs  
In our food and in our blood  
Chemical death to the corporate slut

Pollute the earth with pesticides like DDT  
Money, power, profit, gain is all you can see  
Everyone pays when we take that route  
Dirty water, overcrowded, it's time to take a time out

Keep your head, use your voice  
Speak your mind, you've got a choice  
If no one cares, then nothing gets done  
If no one speaks, what's done is done

Pollute the earth with pesticides like DDT  
Money, power, profit, gain is all you can see  
Everyone pays when we take that route  
Dirty water, overcrowded, it's time to take a time out

Destroy our world, destroy our world  
Destroy our world, destroy our world  
Destroy our world, destroy our world  
Destroy our world, we destroy our world
