(Chorus)

Did you ever get a feeling of dread?
That everything they're saying is not all they've said

Why do they wanna take us to war, yeah
why do they wanna put us in a Government's war?
There's all this fighting and we don't know what for
So the rich get richer, and the poor stay poor

Chorus

Poisoning the Earth and the ground
so death comes swift it never makes a sound
The air is filled with carbon monoxide, choke
on the diesel black clouds and the billowing smoke
Why do people fight over religion and politics?
I spent most of my life trying to figure it out yeah yeah
yeah
It may be a question that never gets answered
It may result in some kind of final disaster
And oh what a shame it would be
but it would set the world free

Chorus (4X)

All that they've said, oh yeah
