Make it good, make it right  
Give her something to believe  
Make it good, stay all night  
Give her something to believe

You know she loves no one but you  
She only ever wanted you  
Treat her good and make it right

Touch her face, hold her hand  
Give her something to believe  
Make it warm, something she can feel  
Give her something to believe

You know she loves no one but you  
She only ever wanted you  
Treat her good and make it right

Don't you think that girl  
Deserves a little better  
Don't you think she needs someone  
You could roam the world  
And you won't do no better  
Treat her right or she'll be gone

Make it good, make it right  
Give her something to believe  
Make it good, stay all night  
Give her something to believe

You know she loves no one but you  
She only ever wanted you  
Treat her good and make it right
