We had the best time of our lives
Being the bad guys singing along
I heard your reasons for leaving
I won't believe it, until you're gone

Go ahead take it away,
but if you wanna stay
I would never let you down
I would never let you down
I would never let you down
I would never let you down

Remember the angels you slept with
Only the best sex would turn you on
I heard your demons were creeping
Well I got a feeling, you ain't alone

Go ahead take it away,
but if you wanna stay
I would never let you down
I would never let you down
I would never let you down
I would never let you down

And maybe you feel like giving up
Or maybe you just had way too much of this town

I would never let you down(x8)
