I used to sing to her
I used to make her smile
She knew all the words
For a while
I sang love me tender
Always and forever
Hold me baby all night long
I could go on and on
But that's another song

We used to go for walks
On a country road like this
It's funny all the small
Things you miss
Like puttin' pennies on a train track
The way you brushed your hair back
The sun on your face
I wish I were there today
But that's another place

CHORUS

Oh, the way I used to hold her
The things I should have told her
If I could make the clock unwind
Back to she was mine
But that's another time

BREAK

CHORUS

Oh, the way I used to hold her
The things I should have told her
If I could make the clock unwind
Back to she was mine
But that's another time

TAG

I could go on and on But that's another song
