When I touch your skin you seem to tremble so  
Can I taste your wrists? my own are going cold  
Can you feel my breathe run down your slender neck?  
Do I make you crazy? And are you tired yet?

Ease your mind and let your heart be mine  
Ease your mind and let your heart be mine

Close your eyes now tightly, try to keep them closed  
I wanna taste your fingers, I need to bite your toes  
Spread your arms out like an angel in my sheets  
It won't be long now before both our shadows meet

Ease your mind and let your heart be mine  
Ease your mind and let your heart be mine

Relax, relax, let your body  
Relax, relax, let your body go
