Ask me if I'm comfortable in this interrogation chair
I'll move you can take a seat and tell me you don't
wanna be there
Take time did it make you feel every way you thought it
would
I don't see what you want with me
When I need you do you feel good?

If you're to use me then lets get this overwith
I know the pain, its setting in
If you're to lose me please dont leave me here like this
I need the flame and its getting dim from lack of air

I've seen everything I need in relation to my life
I know what you wanna see and it cuts you like a paper
knife
Don't pry if you dont think that you can handle whats
inside
Annageenathingayoowalalajooliana only ask you that
you keep your lies!

If you're to use me then lets get this overwith
I know the pain, its setting in
If you're to lose me please dont leave me here like this
I need the flame and its getting dim from lack of air
