Help me out God
I need a little something
Turn the brights on
I can't see where we're going
'Cause I don't know when things'll work out just fine
Or if this road we're on leads us up or is leading me on
down
To my wishing well, where I might drown
'Cause
I can't swim without You, God
Help me out God
I need a little something
Hold my hand
So I know that I'm not falling down or spinning round
Or am I really just fine in this vertigo I feel
Just simply fear or maybe real
It's a long way down
And I might fall
And I might fall
'Cause
I can't stand without You, God
Help me out God
I need a little something
Just enough so I don't lose hope
Before morning comes
'Cause in the sun things'll work out just fine
But this night's been extra long
I fear I won't make it to the dawn
'Cause night is dark
And I might doubt
And I might doubt
'Cause
I can't hope without You, God
Just enough for today
Get me through 'til tomorrow
