They can't see your heart.
They don't care to see who you are.
They're just a pack of wolves.
Don't let them break you down, don't let them break
you down.

You are the starlight that sparks up the whole night.
Just let their voices fade out and stand in the spotlight.
Take a bow.

Everybody's lost.
Most people think they're not..
But I'm not losing you now.
I don't think I can at all.
Don't let them break you down.

You are the starlight that sparks up the whole night.
Just let their voices fade out and stand in the spotlight.
And take a bow.
Please don't run away from me.
I don't wanna find you lost in their lies.
Please don't make a fool of me. (a fool of me now)
Cause I don't wanna find you lost and alone.

One day they'll see.
One day they'll all see.
One day they'll be shouting the truth.
One day they'll all be cheering for you,
they'll all be cheering for you,
they'll all be cheering for you,
they'll all be cheering for you.

You are the starlight that sparks up the whole night.
Just let their voices fade out and stand in the spotlight.
Take a bow.
