(Chorus) Cooper It's like I fell from Heaven but now I'm closer to God Keep my head to the sky as I reach for the stars Society said I should be dead or behind bars MAN FUCK THAT!!!! I'ma stay beating the odds [William Cooper] Ayo the object is simple but the task been difficult Climb the stairway to Heaven where God's house is built Have a word with the Lord about man made laws Like why devils with badges lock us behind bars Spit bars of pain, my body bare the scars As the twelve jewels of life take shape through my darts Squeezing firearms while I reciting the Qu'ran Behold the power on my Psalms to see the future in my palms While the all eye seeing be brainwashing human beings With just a push of button, we all blown into smithereens That's why I live by the secret and put bullet holes in demons It's a dog eat dog world, you gotta eat or get eaten And the flames from the devil's basement Hide behind familiar faces My eyes wide open through the Matrix Remove the blindfold that's the first step out the cages As the world turns life changes (Chorus) Cooper [William Cooper] And I never look down on no man unless I'm pulling 'em up Saint Andrew, first Disciple got Christ in my blood Watch me destroy my enemies when I make 'em my friends Then fall to my knees as I confess my sins That's why my aura stay pure like fresh Gucci Velour Pulling up to Heaven's door on a white on white Porsche Beware of the Pale Horse; embrace the voice of the Lord Those who chose to ignore get stretched out in the morgue We're fighting in a never ending war Man, ain't no money in the cure It's always that quick fix that have 'em coming back for more I know you see 'em on your block in pursuit of the next rock The GemStar Akbar beat the hands off your clock It's a life and death struggle and the devil wanna hug you Can't even speak on the phone you know the government bug you Microchips been planted in the family that love you So until the casket close, keep Heaven above you (Chorus) Cooper
