

Sweetness Theory, The "Save Me"

Visit "[Save Me](#)" on MotoLyrics.com

There is not so much left today
Just to count the stars in the sky and goodbye.
For a time! And goodbye for a time.

The bad days will gone,
The worst things are done,
Just try not to feel lost,
Today feel safe.

Will You save me?
Save me?! Just like you always the same again.

You said you cared about me,
But the thing is that I can't see,
I can't believe, it's mystery

Addicted to loosin',
You create those stars in the so wrong parts.

Will You save me?
Save me?!

Will You save me? Just like you save those stars again.
Save me?! Just like you always the same.

Is there someone you know? Is there someone you
love?
