(Carson Chamberlain/Billy Simon/Randy Boudreaux)

I love the way you feel right next to me
Your touch is way beyond my wildest dreams
You could be a million miles away
But the love I have for you will always stay

Right here - in the center of my soul
All I'll ever long to hold
I'm holding now
Right here - feel the passion in my kiss
All I'll ever long to give, I give to you
Right now, right here

My love for you goes way beyond the heart
You and I will never be apart
On this earth and through eternity
I want you to know, you'll always be

Right here - in the center of my soul
All I'll ever long to hold
I'm holding now
Right here - feel the passion in my kiss
All I'll ever long to give, I give to you
Right now, right here

I'll keep every dream, your every hope, your every fear
Every kiss, every smile, and even every tear

Right here - in the center of my soul
All I'll ever long to hold
I'm holding now
Right here - feel the passion in my kiss
All I'll ever long to give, I give to you Right now, right
here
