The planets are changing  
Their magnetic fields  
Energy fields, brightness  
And their atmospheres  
When Voyager 2  
Flew over planet Neptune  
It was offset  
From the rotational pole

Re-location of mankind enforced

Our solar system is about to shift  
The glowing plasma  
Has recently increased  
Energy flowing into the sun  
Spreading it out along  
Its equatorial plane

Systematic removal enforced

Destinazione Spazio  
Vola Kosmonauta
