"Space Overdrive"

Visit "[Space Overdrive](#)" on MotoLyrics.com

Fear is gripping me so tight
My starship is drifting
Aimless in flight
It's time to activate my mind
Mechanical pilot now comes alive

Storms of electricity
As digital implants are powering me
But now, running through the void
I can't stand the warp
Even if I'm a droid

Deep in my synthetic soul
I am falling down out of control
Light years of silence and stars
Will I return back to the sun

Space is cracking up my brain
Falling to pieces
I can't stop my pain
A war inside my head
Invisible forces are driving me mad
