"Starless"

Visit "[Starless](#)" on MotoLyrics.com

I'll never forget the silent sun
There was a universe around
The golden starship made no move
Into the red light all above
And when we watched the sky
We never felt so high

And you said it would last forever
Angels always fly there if you stay...
And you said you would wait forever
We will be together one day

Recalling the distant memories
I'm travelling through the galaxies
So time goes by and still the moon
Keeps spinning around the blue
And when I watch the sky
I wonder where you're now
