# "Supernova"

Visit "[Supernova](#)" on [MotoLyrics.com](https://MotoLyrics.com)

The light always shines  
When I travel around  
The stars, the milky way  
The moon and the sun

My mind like a ship  
Through memories flies  
Vast space, distant shores  
Dark endless skies

Ref:  
Where are you now?  
Lost inside your alien soul  
Searching for  
The supernovae  
And the stars  
Where are you now?  
In another galaxy  
Watching me  
Longing for the past

The screens visualize  
Holograms of the moon  
The blue of the skies  
And pictures of you

As time goes by  
Days flow like tears  
Clouds blown away  
By the solar wind
