

Wonders, The "I Need You"

Visit "[I Need You](#)" on MotoLyrics.com

I never thought my life would end up quite this way
Sometimes it's hard to figure out what I should say
I've try too long to mend this broken heart
I need you
That thing you do

When we're apart I find it very hard to smile
You know the other girls had never been my style
Well There's a feeling that I get when I'm with you
I need you
That thing you do

I could search around the world only to find
The only thing I need is you, right by my side

There's a feeling that I get when I'm with you
Oh woe woe
That thing you do

I could search around the world, only to find
The only thing I need is you, right by my side

I never thought my life would end up quite this way
Sometimes it's hard to figure out what I should say
I've tried too long to mend this broken heart
I need you
That thing you do
Ohhhh I need you
That thing you doOoOoO
