I'm coming the room
I move them closer,
girl slip off the shoes
and take all that heavy cloth
seated on the bed yeah
teach me like your..
I'ma get the bad, yeah
take all this where all you..all by you

Working with hand slow
and side by side you're thankful
body after that, tell me are you comfortable

Are you comfortable
'cause I like to take things slow
for us to beat up for retention yeah
you gotta really let go
I'm on the tender lights
grow up to daddy, girl are you ready
we're gonna take our time
and do things right

Are you comfortable
that's when I need to know
for us to reach up for attention
we gotta get you in the zone
but you got to go
that's why I need to know
for us to reach up for attention
you gotta really let go

I'm talking to you, I'm talking to you
get in..head I won't make her move
I ain't just don't stand
sipping on some..loving on that..
your eyes are telling me, yeah
that this love is over tune
but I like to take it slow
the energy is build in, we embrace the feeling
almost ready to go

Are you comfortable
is there anything that I can do
to think you really know
baby make you know, baby make me know, oh
Are you comfortable
Baby won't you..
that's why I need to know
for us to reach up for attention
we gotta get you with the zone
Are you comfortable
I like to take you slow
for us to reach up for attention
we gotta let go, oh yeah
